U.S. Patent and Trademark Office PTOL-326 (Rev. 1-04)

He

Application/Control Number: 09/900,368

Art Unit: 1723

DETAILED ACTION

Claims 1 and 19-22 are pending after the RCE of 2/3/05

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 19-22 are rejected under 35 U.S.C. 102(b) as being anticipated by, or in the alternative, under 35 USC 103(a) as obvious over Isaksson et al (US 5,443,806).

Claim 1: Isaksson teaches a filter device (see figures 2-4) having plurality of hollow tubular filter elements (39 with respect to fig 3)disposed in a hollow manifold (37), hollow filtrate conduit (38), filter tube having permeable wall (fig 1) and filtration being from outside-in (see inlet 32 and outlet 33). The device is being capable of vertically and removably secured (see 315- support plate). Re the limitation, "a vessel enclosing within a slurry comprising particulate solids in a slurry liquid", is intended use. A claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" if the prior art apparatus teaches all the structural limitations of the claim. *Ex parte Masham*, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987). It would also be obvious to one of ordinary skill in the art at the time of invention that the Isaksson apparatus

Application/Control Number: 09/900,368

Art Unit: 1723

having the ceramic candle filters (column 6 lines 20-25) would be useable for filtering the liquids form a slurry as well.

Claim 19: plurality of filter section – see figures.

Claim 20: horizontal manifold (37) and vertical conduit (38)

Claim 21: filter elements vertically disposed (39) and horizontally arranged

Claim 22: filter elements are hollow cylinders with one end closed and other end open to the manifold – col 6 lines 21-21-30.

Response to Arguments

Applicant's arguments filed 7/11/05 have been fully considered but they are not persuasive.

The argument that the Isaksson teaches a fluidized bed reactor where as applicant claims a slurry reactor: Applicant's claims recite a filter for filtering solid particulates from a liquid-gas mixture. Isaksson teaches a filter for filtering solids form a gas stream. Structurally the two filters are same; and the Isaksson filter is useful for filtering solid particulates from a liquid stream as well, and such use is only intended use. Argument that Isaksson teaches a fluidized bed reactor to reduce nitrogen oxides, etc., are not relevant because what is used in the rejection is the filer, not the fluidized bed reactor. In Isaksson, figures 2 and 3 show the filter, which is attached to the reactor to filter the gases coming out of the reactor.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krishnan S. Menon whose telephone number is 571-272-1143. The examiner can normally be reached on 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda L. Walker can be reached on 571-272-1151. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
